

# Green is good!

Going green has never made more sense.

Compared to ordinary homes, a David Weekley Green Home can save up to 50% in heating and air conditioning usage over a similar home built to 2004 building code standards. It's healthier for your Client. It's more comfortable. It's easier on the environment.

And if all that isn't enough to convince you, consider this: your Client's David Weekley Green Home has features that can help resell the home when compared to ordinary homes. Because from now on, any home that isn't green may be obsolete. *Getting more green begins to take on a whole new meaning now, doesn't it?*

The more you learn the more you know this is no time for your Client to settle for an ordinary home. Ask your David Weekley Sales Consultant to show you how good green can be. Or visit our website for details.

*Green*

"David Weekley Green Home" is a trademark of Weekley Homes, L.P., which describes certain features and criteria designated to make homes more economically sustainable over the long term and reduce energy consumption and the resulting environmental impact. It does not infer sponsorship, approval, or affiliation with any other program or green building certification other than those specifically stated in the product features, warranty or contract. All-electric homes do not currently qualify for *Environments For Living* Diamond certification, and may not provide the 50% reduction in heating and cooling costs. *Environments For Living* is a registered trademark of MASCO Home Services, Inc. Valid on homes started after April 1, 2008. Prices, plans, dimensions, features, specifications, materials or availability of homes or communities are subject to change without notice or obligation.
